

Program Name	Location	Director/Program	Program Director	Number of Residents in each class	Length of Away	Number of residents	Any rotations offered on campus?	Program/Rotation Description	Thoughts?	Wishes/notes?	Required AT/Transitions?	Do you go back to clinic?	Did you get a LOR from any?	Follow-up?	Independent/Combined	Resident Tips	% of normal residents who are in-house? (Approx.)
U Florida	Kansas City			2				Great experience in all aspects of PHS - Hand, Cosmetic, Burn, CF, Flaps (JEN Rauser, Trauma). Take free paper call about OR, resident to interns on call. A lot of autonomy in OR call. Expected to read every morning/night notes. PHS functioning as an interns. Always first/second call in OR. Lexington?	Expected to function as part of the team and respected by residents and faculty when doing so. Hospital is expanding a lot. Slightly adding a hand/macro faculty 2015. Resident function will together, too, as the other did with them on multiple occasions. Got on microscope with chief resident. Very clinically strong.	Expected to work hard, had some free time during rotations, but worked a lot of weekends. Light on Micro Burn cases. Attending can be... pretty? Research is resident driven mostly, but supportive.	Yes		No	Yes	Yes	Majority, they like it.	
U Kentucky	Lexington, KY	Dr. Henry Vasserman	Dr. David Stewart	2	4 weeks (that can be flexible)	3	No	Another opinion: One service covers all the hospitals on the UK campus except for the resident off rotation. Everyone meets in the morning and gets up for the last for rounds. No pre rounds, no such. There is usually an intern on call, except on the last day usually appointed and printing it was all that was heading to the OR for the day. As to sub's you are up on the university call (usually and on the call for 10 minutes on the floor. I think some getting used to the but was great practice for interns year. Split weekend call with other rotations and then great practice for interns year. Split weekend call with other rotations and then great practice for interns year.	Another opinion: Good variety of cases, lots of hand trauma and face trauma. Another opinion: Very friendly, laid back and generally very nice. They even arranged schedules for "how to apply" and "how to interview" with dinner at faculty homes, where Paul Cedeno in particular is a huge advocate for students (I would request to work with him before you go to his office). You will be pumped, get a chance to get your hands dirty, and get a chance to improve.	Another opinion: Didn't meet many of the 1st or 2nd years while on rotation, but get the feeling that the first two years are time intensive, but they have a great general surgery dept.	Yes	Yes	No	No	Just be a normal, hard-working person. They will respect it. Read, Vasserman likes his surgical history.	Majority, they like it.	
U Massachusetts	Worcester, MA	Raymond Dunn	Raymond Dunn	2	4 weeks	3	No	Sub is spend two weeks each on two services. Typically the options are Plastic (plastic wound care) and (and could be a hand plastic/burn) and Hand. Students help round in the morning and attend cases during the day. Weekly conference, students call out on two weekends.	Very strong educational focus, residents and faculty try to ensure you get a good experience. Another opinion: Basic science research is there if you want it. Another opinion: Faculty fairly good knowledge with some unique cases (e.g., hand/trauma, trauma). Basic science research is there if you want it.	Another opinion: Program seems concerned with publishing, then training future plastic surgeons. Not all faculty residents are pleasant to work with. Patient demographic diversity is lacking (10% of the we operate on only white folks).	Yes	Yes	No	No	Should read all medical cases, and know how to draw the different types of plating and angles with cervical/garland length. Also know relevant anatomy for hand/wrist cases. The attending for the most part are also fairly heavily in the residents, you really need to impress them.	50	
U Michigan	Ann Arbor, MI	Paul Cedeno	Steve Kazian	4	4 weeks	4	No	Sub is spend two weeks each on two services. Typically the options are Plastic (plastic wound care) and (and could be a hand plastic/burn) and Hand. Students help round in the morning and attend cases during the day. Weekly conference, students call out on two weekends.	Good variety of cases with strong pre-OP experience. Do not need to carry patients or write any notes. Attending are great at teaching in the OR. Will get to have attending help. Letter from Dr. Puckett will be an asset to be well known and respected in the field.	Another opinion: Program seems concerned with publishing, then training future plastic surgeons. Not all faculty residents are pleasant to work with. Patient demographic diversity is lacking (10% of the we operate on only white folks).	Yes	Yes	No	No	Should read all medical cases, and know how to draw the different types of plating and angles with cervical/garland length. Also know relevant anatomy for hand/wrist cases. The attending for the most part are also fairly heavily in the residents, you really need to impress them.	50	
U Minnesota	Ann Arbor, MI	Paul Cedeno	Steve Kazian	4	4 weeks	4	No	Sub is spend two weeks each on two services. Typically the options are Plastic (plastic wound care) and (and could be a hand plastic/burn) and Hand. Students help round in the morning and attend cases during the day. Weekly conference, students call out on two weekends.	Good variety of cases with strong pre-OP experience. Do not need to carry patients or write any notes. Attending are great at teaching in the OR. Another opinion: Program seems concerned with publishing, then training future plastic surgeons. Not all faculty residents are pleasant to work with. Patient demographic diversity is lacking (10% of the we operate on only white folks).	Yes	Yes	No	No	Should read all medical cases, and know how to draw the different types of plating and angles with cervical/garland length. Also know relevant anatomy for hand/wrist cases. The attending for the most part are also fairly heavily in the residents, you really need to impress them.	50	
U Tennessee	Tampa, FL	Dave Smith	David Smith	3	4 weeks	Varied	Yes	Sub is spend the rotation in two week blocks, at either Tampa General, MCF, at their VA. Attending of the hospitals like Tampa general will have about 1-2 more per week.	Good variety of cases with strong pre-OP experience. Do not need to carry patients or write any notes. Attending are great at teaching in the OR. Will get to have attending help. Letter from Dr. Puckett will be an asset to be well known and respected in the field.
