RE: **Primary Care Physician ability to detect PTSD** (Protocol #H16-013X – student research by J. Della Porta)

Dear Dr. Festinger:

The study materials for your above-referenced protocol amendment dated August 2, 2016 were reviewed and approved under expedited review procedures. This expedited review was conducted under 45 CFR 46.110(b)(2): minor changes in previously approved research during the period (one year or less) for which approval is authorized.

Good luck with your study and please remember to report any adverse events to the Board immediately. Any further proposed modifications to the protocol or informed consent, including changes in study personnel, the number of subjects to be enrolled or ancillary study documents such as questionnaires, must be approved by the Institutional Review Board before they can be implemented.

Sincerely,

Virginia Salzer, Ph.D.  
Chair, PCOM IRB
