

Human Experimentation Committee/Institutional Review Board

January 9, 2020

Dr. Ivelisse Rivera-Godreau
Nicole McAmis
Frank H Netter School of Medicine

Dear Ivelisse & Nicole,

Upon review by our Human Experimentation Committee/Institutional Review Board (HEC/IRB), the proposal entitled ***Assessing health care provider knowledge of human trafficking*** has been assigned protocol #00420 and approved under exemption from federal regulations. It satisfies the criteria for exempt category 2(i), research involving survey procedures where information obtained is not identifiable (45 CFR 46.104.D). Please understand it is your responsibility to maintain compliance with institutional and federal policies regarding research with human subjects and that should any of the protocol elements change, the HEC/IRB should be notified immediately.

Sincerely,

A handwritten signature in dark ink that reads "Richard Feinn".

Richard Feinn, PhD, CIP
Chair, Quinnipiac HEC/IRB
